Exercise: Create a Pokemon Card with Shadow
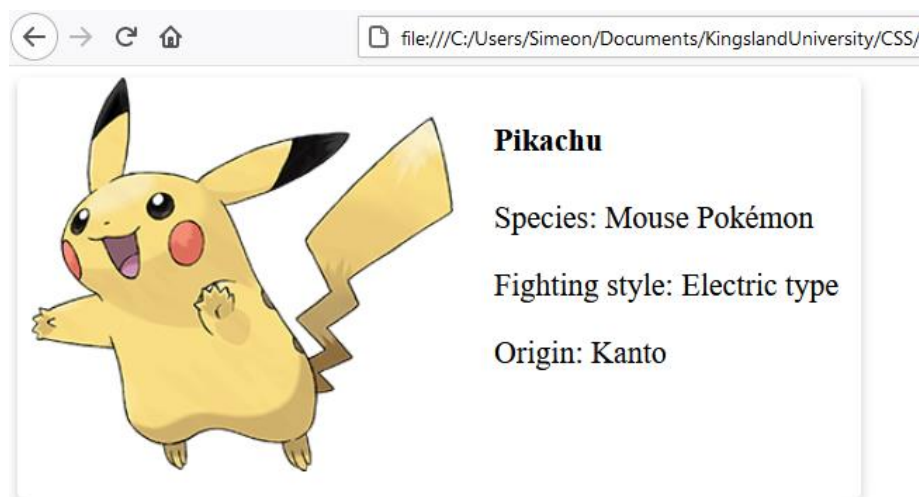

1. Create a Card with Hover Effect

Use your skills and create a webpage containing a pokemon card like this.

- Make the card to have a shadow.
- Set the card, image, text size, etc.
- Make the card border with curve angles.
- Make the card when the mouse cursor is over the shadow will appear.

  Hint: Use the **:hover** pseudo-class.

The web page should be like this:

Without shadow.

With shadow.
